

AMERICAN AUTO JOBS MATTER: FIVE KEY POINTS

1 Auto jobs matter to America.

Nearly five million U.S. jobs depend on automakers. They are America's #1 exporter, a leading buyer of parts and materials, and our largest source of R&D.

2 Some automakers contribute more than others.

GM employs more Americans than all 16 foreign automakers combined. Ford operates nearly as many assembly lines as Toyota, Honda, Nissan and Hyundai combined.

3 The JPC Rating makes it easy to compare cars.

This fast, reliable online tool calculates a jobs-per-car rating, based on how many U.S. workers each company employs for every 2,500 cars it sells here.

4 Auto parts play a big part in the job story.

Automakers who use more domestic content help secure the jobs of 780,000 auto parts workers. Ford, GM and Chrysler use 85% more American auto parts.

5 R&D is the future of the American auto industry.

This \$17 billion industry translates into more jobs, more infrastructure investment, not to mention better, safer cars for all of us. By showing our support for American autoworkers, we give automakers more reason to keep investing in this area.
